Hello !

Hope you're keeping safe and well! Thank you for your application for the first AI Summer School hosted by Google Research India.

We saw a large number of applications, each of which went through a thorough review process. We are delighted to let you know that your application has been accepted to participate in the Summer School.

We have a stellar line-up of Speakers for the Summer School that represents a global set of research leaders. The goal is to provide students such as yourself an opportunity to engage with research leaders directly. The summer school is structured to have 1 Hour Lectures on contemporary topics in the field of AI (discussing a few papers and topics) followed by a Research Discussions where you get to discuss and engage in critical questions about the material discussed from it's critiques, method robustness and so on.

We expect all our participants to actively engage in a lively discussion -- this is an incredible opportunity and we hope you make the most of this! To keep each lecture <50 people, there will be three parallel tracks and hence the limited number of acceptances.

Will the summer school have you work hard? Yes! Will it be worth it? Also yes! We will also have lots of opportunities to have virtual social gatherings, networking opportunities, panel discussions and also learn about research careers at Google!

We have selected students such as yourself who have shown strong research potential. We expect you to spend ~6 hours every day during the three days of the Summer School, we will communicate the exact schedule soon. Given the large number of timezones we are managing, expect 1 lecture in the mornings and 1 in the afternoon followed by social events. Some students who opted for Computer Vision will be assigned to NLU or the AI4SG + HCI track given the oversubscription and we are confident you will have a lot to learn in each of these areas.

Please confirm your attendance for the Summer School on this Google Form (https://forms.gle/ePe6rtxh3Bs5AU856) by Monday (10th August) **(Hard Deadline).**

Please understand that there are thousands of applicants that we could not accommodate, if you do not plan to attend the summer school, let us know on the form right away so we can give your seat to the next student.

A final surprise is we have some cool Google Goodies for our attendees - please do fill in your postal address so we can have them delivered to your doorstep.

Watch out for the detailed attendee guide over next week with all the logistics.

Best Regards,
Divy Thakkar, Organizing Chair
(on behalf of Program Chairs - Manish Gupta and Ashwani Sharma)
